BANGLADESH-BASED. GLOBALLY COMPLIANT.

2,000,000

UNITS PER MONTH.

END-TO-END GARMENT SOURCING, MANUFACTURING & LOGISTICS INFRASTRUCTURE FOR INTERNATIONAL FASHION BRANDS.

EXECUTIVE SUMMARY.

WHO WE ARE

Fashionid Company is a full-service garment sourcing and contract manufacturing agency headquartered in Dhaka, Bangladesh. We operate as a single accountable point of contact across the entire pipeline from raw material procurement to freight-forwarded delivery. Our verified output stands at 2,000,000 pieces per month, 100% export-quality, across nine product verticals.

THE PROBLEM WE SOLVE

International brands entering Bangladesh face predictable supply chain failures: factory misrepresentation, inconsistent quality tolerances, and logistics blind spots that destroy delivery windows. Fashionid acts as an embedded procurement and compliance layer between the brand and the factory floor. We manage specifications, monitor production in real time, and enforce quality protocols from cut to carton.

WHY IT MATTERS

Bangladesh is the world's second-largest garment exporter. Accessing its full cost and scale advantage requires a ground-level partner with verified factory relationships, not a broker. Fashionid's leadership carries 15+ years of active, on-ground presence in this market. We do not sub-contract your oversight. We embed it.

OPERATIONAL INFRASTRUCTURE.

SOURCING

1. **Ready-made garment** procurement across verified factory network
2. Raw fabric sourcing: woven, knit, denim, and specialty textiles
3. Trims and accessories procurement: hardware, labels, zippers, thread
4. Supplier vetting and compliance pre-screening included as standard

PRODUCT DEVELOPMENT

1. Concept-to-sample development for new SKUs
2. Technical pack interpretation and specification alignment
3. Prototype and pre-production sample management
4. Iterative revision cycles with documented approval workflow

CONTRACT MANUFACTURING

1. Fabric dyeing and finishing coordination
2. Precision cutting, sewing, and assembly
3. Uniform and specialty workwear production
4. MOQ flexibility structured around brand growth stage

QUALITY CONTROL

1. Custom packaging design and label stockholding
2. Consolidated packing and warehousing at Dhaka facility
3. Multimodal freight: sea, air, and land mode selected by cost-window analysis
4. Documentation management: commercial invoice, packing list, COO, B/L

PRODUCT VERTICALS.

2,000,000 UNITS / MONTH · 100% EXPORT QUALITY · 9 ACTIVE VERTICALS

PRODUCTION BASE: DHAKA, BANGLADESH · STANDARD: INTERNATIONAL EXPORT GRADE

Custom verticals assessed on request. Sampling and development available across all categories.

COMPLIANCE & RISK MITIGATION.

01 OPERATIONAL TRANSPARENCY

Fashionid operates an open-facility policy for all active clients. Brand representatives and auditors may conduct on-site visits at any production stage without restriction or prior notice.

02 IP PROTECTION & CONFIDENTIALITY

All engagements begin with a formal NDA executed before technical pack review. Client IP, specifications, and designs remain exclusively owned by the commissioning brand and are never shared or repurposed.

03 FACTORY & SUPPLIER STANDARDS

Our network undergoes ongoing compliance evaluation against international export standards. We prioritise partners with documented safety records and verified fair labour practices; credentials are available on request.

04 RISK CONTAINMENT PROTOCOLS

Production advances only through documented client approval at each milestone gate. No shipment proceeds without written sign-off, eliminating post-transit defect disputes and supply chain liability for the brand.

Fashionid accepts full operational accountability within the scope of each client agreement. Issues identified during production are resolved at source — not negotiated post-delivery.

COMMAND & CONTACT.

MOHAMMAD ARIF AKRAM

MANAGING DIRECTOR

M

Fifteen years of active procurement and production management in Bangladesh's RMG export sector. Primary authority on client acquisition, strategic partnerships, and manufacturing compliance decisions.

MOHAMMAD ADNAN AKRAM

DEPUTY MANAGING DIRECTOR

M

Ground-level manufacturing specialist with direct supervisory authority over factory floor execution. Responsible for production throughput, vendor accountability, and on-site quality enforcement.

MOHAMMAD AZAM AKRAM

DIRECTOR — LOGISTICS & DESIGN

M

Oversees end-to-end logistics coordination and the full product development pipeline. Translates creative briefs into precise technical specifications for factory execution and manages all freight operations.
